COMMON JAVA IN HEP

All major HEP projects using Java (Colt, Jas, Wired) have agreed on the common organisation of code (namespace) like:

hep.geometry ... *interface and reference impl.*
hep.geometry.atlas ... *implementation*
hep.geometry.wired
...
hep.geometry_V2.0 ... *version*
...
cern.colt ... *exist as well*

hep.geometry.detector atlas = new hep.geometry.atlas.detector(...)

CVS Server will be created.

COLT

Open Source Libraries for
High Performance Scientific and Technical Computing in Java

The Colt, Jet, JAL, VNI and RngPack libraries
